

Defence

RF Test Solutions Ltd is the largest supplier of general-purpose (Common Off The Shelf) Test and Measurement Instrumentation to the NZ Defence Force. We also supply Calibration and Repair services directly to Defence and Defence Contractors through our ISO 17025 IANZ Accredited Laboratory.

Our suppliers, including Agilent Technologies and VTI Instruments, lead the transformation of measurement tools and systems used by Defence Departments around the world. Innovations such as LXI and Synthetic instrumentation are creating smaller, more versatile solutions with much greater connectivity and re-use.

Examples of the solutions RF Test Solutions Ltd provides the NZ Defence Forces with:

- General purpose handheld and bench instrumentation from multi-meters to spectrum and network analysers.
- Bench instrumentation for depot-based fault-finding and repair verification.
- On-site instrumentation calibration via our mobile laboratory and return to RF Test Solutions repair and callibration.
- Complex instrumentation and systems used by specialist Defence research and security groups.
- Specialist communications signal monitoring and analysis building blocks and systems.
- Specialised measurement services
- Instrumentation rental.
